**Home Health Care**

Home health care is a wide range of health care services that can be given in your home for an illness or injury. Home health care is usually less expensive, more convenient than and just as effective as care you get in a hospital or skilled nursing facility (SNF). Home health care may include the following services: skilled nursing, physical therapy, occupational therapy, speech therapy, social services, home health aides, nutritional services and infusion services.

Home Health Care

Home health care is a wide range of health care services that can be given in your home for an illness or injury. Home health care is usually less expensive, more convenient than and just as effective as care you get in a hospital or skilled nursing facility (SNF). Home health care may include the following services: skilled nursing, physical therapy, occupational therapy, speech therapy, social services, home health aides, nutritional services and infusion services.
